Norwich, Saturday, April 11, 1914.

The Circulation of The Bulletin

The Bulletin has the largest circulation of any paper in Eastern Connecticut, and from three to four times larger than any in Norwich. It is delivered to over 3,000 of the 4,053 houses in Norwich, a record by ninety-three per cent of the people. In Windham it is delivered to over 300 houses, in Putnam to over 1,000, and in all of these places it is considered the local daily.

Eastern Connecticut has forty-nine towns, one hundred and sixty-five postoffice districts, and sixty rural free delivery routes.

The Bulletin is sold in every town and on all of the R. F. D. routes in Eastern Connecticut.

CIRCULATION

1901 average..... 4,412
1905 average..... 5,920
April 4..... 8,742

CLEAN-UP CAMPAIGN.

Norwich should enter into the spirit of the clean-up campaign which is about to be started again this season, with a determination that it shall be a community rather than an individual affair. It is the continuation of a movement which was started last year and one which should be continued whenever and wherever the opportunity exists for putting the city and its environs in a more sanitary and healthful condition. It is a campaign which can afford to ignore the motives of such an undertaking, and no citizen who can be expected to contribute to the benefit of the city should be excused from participating in it. There is no city which can afford to ignore the motives of such an undertaking, and no citizen who can be expected to contribute to the benefit of the city should be excused from participating in it.

Many hands make light work, and must any task. Most every section of the city has eyesores which can be removed by the clean-up campaign. It is a campaign which can afford to ignore the motives of such an undertaking, and no citizen who can be expected to contribute to the benefit of the city should be excused from participating in it.

MATTER OF IMPORTANCE.

The calling of state republican conventions for the ratification of the changes which have been made by the national committee concerning basic laws of representation, and other matters which concern the national convention, will vary in the different states in accordance with the provisions of their respective constitutions. In the case of the state of Connecticut, the convention will be held on the first of the month of May, and it is the duty of every citizen to attend it. The convention will be held on the first of the month of May, and it is the duty of every citizen to attend it.

HARTFORD'S EXPERIENCE.

As a result of the experience which Hartford has had this week with one of its voting machines the people of that city have found out, though perhaps it is a little late, that a voting machine is not a machine at all, but a man. It is a man who has been put in a machine, and it is a man who is doing the work. It is a man who has been put in a machine, and it is a man who is doing the work.

testing of the machines, which are supposed to be put out of action should such a clogging take place, remains to be explained. While it may be an instance where mechanical contrivance is as apt to err as human nature, yet it does not destroy the confidence in the value of voting machines. If, as in some other things, greater safeguards are required, or more substantial construction needed, it is time to remedy it. The entire affair has brought to attention the real importance of machine inspection, testing and supervision. While perfection may not have been attained as yet, the good features totally eclipse any shortcomings.

GOVERNMENT TELEPHONES.

The general apathy which is manifested throughout the country in behalf of the idea of government ownership of the telephone lines is only what is to be expected from the very nature of the proposal which has been set before congress by Congressman Lewis of Maryland. Naturally such a matter calls for enlightenment concerning the instances where such ideas have been put into operation. We know all too well how governments, in the past and conditions and reports show that no democratic country has shown in its public industry a spirit of progress comparable to that of private industry.

REFORMATORY BRICK MAKING.

Regardless of whatever may be said about convict labor and convict brick roads, it is an experiment which is being tried in the state of New York. In the establishment of a brick making plant for the production of brick for road building purposes, it must be demonstrated in the first place that good vitrified brick such as will meet all the requirements for road work can be made at the Elmira reformatory where the plan is to be tested out, but thereafter it should prove of great importance in contributing to the stability of the state roads. Permanent to the great requirement in road building today and it has been a long established fact that brick roads furnish that quality as well as all the others.

EDITORIAL NOTES.

Even the April shower experiences the difficulty of trying to please everybody. It is surprising that there hasn't been more agitation for a society to prevent useless Easter spending. Spring may be full of good intentions but there are times when it must become awfully discouraged itself.

There is likely to be some careful scrutiny of the democratic party by the people of this state. The young lady who has determined not to marry until the one hundredth proposal, is getting some good practice in sticking to the negative side of a proposition.

THE MAN WHO TALKS

In this world it is better to be struck by a good idea than by a bad one. Good ideas are like lightning. They come and go, and they are not to be trusted. They are like lightning. They come and go, and they are not to be trusted.

Ignorance of the law excuses no man unless it is the selection of a town, or the man who did not know it was his duty to know it.

There is no other way to find it than in your own opinion of the people.

There is no other way to find it than in your own opinion of the people.

There is no other way to find it than in your own opinion of the people.

There is no other way to find it than in your own opinion of the people.

VACATION DAYS

(Written Specially For The Bulletin.)

May they all be as pleasant and sunny as to-day, Monday, April sixth. The vacation days are here, and they are here to stay.

With the girls, all the dolls must have their attention as the first duty to their little mothers.

Telephone 1073-2 340-342 Franklin Street

EVERY DAY REFLECTIONS

Forward Not Backward.

It is not pleasant to know that the younger generation is outstripping us, leaving us behind, calling us old-fashioned and obsolete. The mere names of the things that we used to have may be actually unprogressive.

Forward Not Backward.
